

## **Living Donor (*Subtopic Heading*)**

### **What is a living donor? (*Support #1*)**

A living donor is someone who is still alive and has not died yet. Some donors can stay living after they donate because they do not need the organ they donated, such as an extra liver, or piece of skin, or an extra eyeball, (Gondringer, 2018) (*Parenthetical*). Many people choose to donate their organs because they want to help other people. According to Johnson (2018) (*in-text*), organ donation can save up to eight lives so it's crucial for everyone to sign up to be an organ donor.

### **Process of donation (*Support #2*)**

### **How can receive the organ (*Support #3*)**

Tips to keep in mind:

1. Roughly 1.5 pages
2. Need to have your subtopic heading AND supports headings
3. No more than two DIFFERENT sources for the entire subtopic
4. Sources need to be either parenthetical or in-text cited
5. Sources need to have author's LAST name AND publication year
6. No transitions needed
